[How much will the vessel removals cost?](#)

Johan,

Attached is an email describing cost to remove remaining vessels that I put together in November. If you need more detail let me know. It is a rough estimate of course. Some of the vessels are probably gone but new ones have taken their places.

The attached spreadsheet that I recently sent to Rep. Orcutt describes historically how much has been spent on recreational vs. commercial vessel by DVRP, as well as information on the number and size of existing registered recreational and commercial vessels.

I have attached two maps that we drafted for one of the work sessions. If you need anything else let me know. Thanks!

**Subject:** Derelict Vessel information

Melissa,

Johan asked me today for the same information that you provided to legislators, regarding the backlog of derelict vessel costs (estimate) of approximately \$22 million and for a map showing the location of derelict vessels. (He is interested in requesting funding for the removal of derelict vessels)

When you get a chance can you please provide Johan with this information?

Thank you!!

Alicia
